

FINANCE & BILLING

Billing Software

Speed up store checkouts, auto-calculate taxes, and track daily sales logs.

Executive Summary: An intuitive, lightning-fast Point of Sale (POS) billing software crafted for modern retail counters, supermarkets, and distributors. Designed to work offline and sync to the cloud, it enables rapid barcode scanning, automatic GST tax breakdowns, customer credit register mapping, and detailed daily profit reports.

CORE KEY CAPABILITIES

- ✓ **Barcode Scanning**
Instantly scan item barcodes and add them to active invoices within milliseconds.
- ✓ **GST & Multi-Tax Setup**
Configure CGST, SGST, IGST, or flat discounts per category or individual item.
- ✓ **Thermal Receipt Support**
Print formatted invoices directly on 2-inch or 3-inch thermal printers.
- ✓ **Customer Credit Book**
Keep a tab on customer credit, outstanding dues, and log payments easily.

ARCHITECTURE MODULES

Checkout POS Terminal

The clerk interface displaying product searches, barcode logs, payment methods, and discount inputs.

Sales Inventory Sync

Tracks stock levels on the fly, deducting quantities from store inventory records immediately upon checkout.

Finance Accounting Reports

Daily drawer reconciliations, tax reports, item-wise profitability margins, and customer credit registers.
