

HEALTHCARE & SOCIAL

Clinic Management System

Store electronic health records, write digital prescriptions, and manage OPD billings.

Executive Summary: A complete EMR solution designed for clinical chambers, wellness centers, and small hospitals. Empower doctors to log digital medical files (EHR), print smart prescriptions, manage OPD billing charts, track lab report logs, and run pharmacy inventory details smoothly.

CORE KEY CAPABILITIES

- ✓ **Digital Prescription Writer**
Select preloaded drug names, suggest dosages, and print details in 30 seconds.
- ✓ **EMR Patient Portfolios**
Log medical history, scan uploads, vitals, allergies, and lab reports.
- ✓ **OPD Billing & Invoices**
Generate simple consultation invoices and print them on standard papers.
- ✓ **Pharmacy Stock Tracker**
Manage clinic pharmacy stock, check batch expiries, and log low thresholds.

ARCHITECTURE MODULES

Doctor Consulting App

EMR console for doctors to log patient vitals, type complaints, search medication databases, and auto-print prescriptions.

Reception Desk Ledger

Manages patient registrations, prints queue tokens, takes consulting fees, and updates doctors on queues.

Pharmacy Inventory

Manages local medicine supplies, maps batches, handles sales bills, and issues low-stock alarms.
