

HEALTHCARE & SOCIAL

Doctor Management Software

Manage appointment slots, patient queues, and send auto-reminders for visits.

Executive Summary: Optimize patient queues and organize consultation times. Doctors and receptionists can organize available slots, book patient appointments online or via phone, keep track of real-time queues, and auto-notify patients about delays via SMS.

CORE KEY CAPABILITIES

- ✓ **Slot Scheduler**
Define weekly consulting hours, break intervals, and emergency blockouts.
- ✓ **Appointment Booker**
Check slot availabilities and register patient details in one panel.
- ✓ **Live Queue Tracker**
Review active token numbers, check-in waiting states, and completed consults.
- ✓ **SMS Slot Reminders**
Send booking conformations, time slots, and delay warnings dynamically.

ARCHITECTURE MODULES

Doctor Appointment Calendar

Visual day/week/month planner where receptionists drag and drop bookings, reschedule slots, and block dates.

Waiting Hall Token Board

A public monitor view display displaying current consulting patient numbers and active token lines.

Web Booking Widget

An embeddable booking script for the clinic's public website where patients register slots themselves.
