

OPERATIONS ERP

Stock Management ERP

Track real-time inventory, batch codes, and auto-renew items at low levels.

Executive Summary: An enterprise-grade inventory tracker designed to help you organize multiple warehouses, check real-time stock levels, prevent expiry losses, and generate barcode sheets. Manage supplier lists, track returns, and leverage automated analytics to keep your retail or wholesale pipeline running smoothly.

CORE KEY CAPABILITIES

- ✓ **Multi-Warehouse Tracker**
Track and coordinate inventory across multiple physical store locations.
- ✓ **Low Stock Alerts**
Get automatic notification triggers when inventory falls below minimum levels.
- ✓ **Batch & Expiry Control**
Log manufacturing dates, batch codes, and monitor expiring items easily.
- ✓ **Supplier Ledger logs**
Track supplier purchase history, paid balances, and active purchase returns.

ARCHITECTURE MODULES

Stock Catalog & Barcodes

Register SKUs, map item variants, generate printable barcode templates, and log starting inventory.

Warehouse Transfer Engine

Track internal warehouse transfers, manage stock audits, and check pending gate passes.

Purchase Reorder Center

Calculates auto-reorder sheets, manages PO history, and records incoming items via GRN.
