

OPERATIONS ERP

Visitor Management System

Automate check-ins, digitize gate passes, and secure your facilities with OTP & QR solutions.

Executive Summary: Our premium Visitor Management System simplifies your front-desk operations. Say goodbye to manual registers and welcome a secure, digital check-in process. With instant host notifications, automatic badge printing, and real-time dashboard analytics, you can safeguard your corporate environment, school, or community hassle-free.

CORE KEY CAPABILITIES

- ✓ **QR Code & OTP Check-In**
Fast and secure contactless entry via digital QR passes and OTP verification.
- ✓ **Instant Pass Printing**
Print high-quality thermal visitor badges immediately upon check-in.
- ✓ **Host Notifications**
Auto-notify hosts via SMS, email, or WhatsApp when their guest arrives.
- ✓ **Blacklist Alerts**
Instantly trigger security alerts if a blacklisted individual attempts entry.

ARCHITECTURE MODULES

Guard Reception Kiosk

An easy-to-use tablet/desktop interface for security guards to scan QR codes, snap visitor photos, and print thermal gate passes.

Employee Host Portal

A dashboard where staff members can view upcoming visits, pre-invite guests with custom forms, and approve or reject instant arrivals.

Admin Security Analytics

The brain of the system, allowing settings customization, blacklist mapping, active log queries, and custom audit reports.
